

1

Glioblastoma Multiformae Brain Biopsies- Formalin fixed- with Immunohistochemical Full Panel evaluation and Confirmation of Diagnosis by neuropathologist-

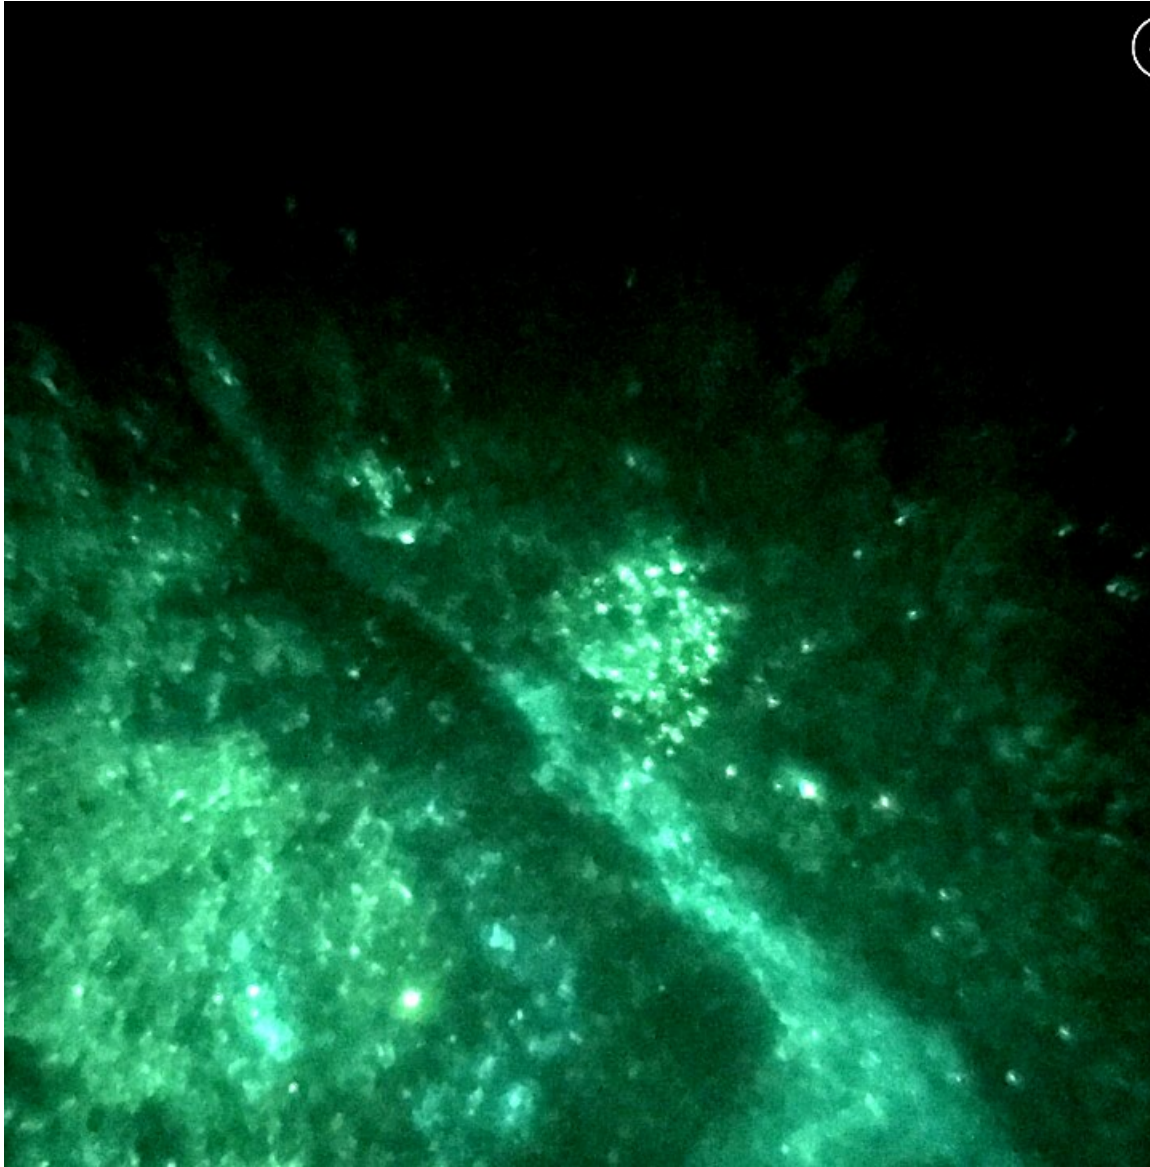

--- Images (3 per case) of FISH DNA probe for detection of Burgdorferi Borrelia Dna  
With DNA probes specific for gene of Inner cell membrane of Burgdorferi Borrelia  
Gene bbo 0740- Validated DNA probe and all Controls acceptable

See Index of Images at the End of the Image Display to correlate with Case number of  
Five of Five cases examined

Index of Images:

Case 1609 - Images on pages 1,2,3

Case 2007- Images on pages 4,5,6

Case 2781 – Images on pages 7,8,9

Case 2964 – Images on pages 10,11,12

Case 6552 -images on pages 13,14,15

Respectfully Submitted,

Alan B. MacDonald, M.D.,

Fellow, College of American Pathologists

January 20, 2016

End of FISH method Report

To follow:

An Addendum Report: IHC of Rabbit anti Borrelia Burgdorferi antibodies with

The proteins in the biopsies in this series of 5 cases.
